HASAN HAMIDOV

Cybersecurity Specialist | SOC, Detection Engineering & DFIR | PAM

Baku, Azerbaijan | hasanhamidovinfo@gmail.com | linkedin.com/in/hasanhamidov | github.com/hasanhamidov

PROFESSIONAL SUMMARY

Cybersecurity Specialist with hands-on experience across incident response, detection engineering, DFIR, and privileged access management (PAM) in enterprise and critical-infrastructure environments. Currently securing national critical infrastructure at Azerbaijan Railways, operating and tuning IBM QRadar SIEM, building detections in Palo Alto Cortex XDR/XSOAR, and administering CyberArk PAM workflows. Brings a strong systems and network administration foundation (Linux, Active Directory, firewalls, VPNs) that enables deeper investigations and more effective detection engineering. Holds a Bachelor's in Information Security (GPA 90.30/100) and is currently pursuing a Master's in Cybersecurity (GPA 95/100) at Azerbaijan Technical University.

Core Platforms: IBM QRadar · Cortex XDR/XSOAR · CyberArk PAM · Microsoft 365 Security · Active Directory · Windows Server · Linux/Ubuntu

TECHNICAL SKILLS

- **SIEM & Detection Engineering:** IBM QRadar — correlation rules, offense investigation, false-positive reduction; Splunk, Wazuh
- **SOAR / XDR:** Palo Alto Cortex XDR & XSOAR — BIOC development, custom detections, automated response playbooks
- **DFIR:** Endpoint, network, and log telemetry investigations; incident response coordination across security platforms
- **PAM & Identity:** CyberArk PAM administration, privileged access operations, secure remote access workflows
- **Cloud & Email Security:** Microsoft 365 security monitoring — phishing, insider threat, and account compromise detection
- **Infrastructure & Networking:** Active Directory, Windows Server, Linux/Ubuntu administration, firewall management, VPN deployment, TCP/IP, VLAN, DNS, OSI
- **Security Frameworks & Tools:** MITRE ATT&CK, Threat Hunting, Digital Forensics, Zeek, Snort
- **Scripting & Automation:** Python (security automation and scripting), Bash
- **Virtual Labs:** VMware, VirtualBox — attack/defend simulations

PROFESSIONAL EXPERIENCE

Cyber Security Specialist — Azerbaijan Railways (Azərbaycan Dəmir Yolları) *Sep 2025 – Present*

Baku, Azerbaijan

- Monitor and investigate security incidents, alerts, and offenses across enterprise environments using IBM QRadar SIEM and Cortex XDR/XSOAR
- Develop and tune correlation rules, BIOCs, and custom detections, improving threat visibility and reducing false-positive alerts by ~30%
- Conduct DFIR investigations across endpoint, network, and log telemetry sources to identify, scope, and contain complex threats before lateral movement
- Administer CyberArk PAM infrastructure, managing privileged access operations and secure remote access workflows for 50+ critical-infrastructure systems
- Monitor Microsoft 365 environments for phishing, insider threats, Teams abuse, and account-compromise indicators
- Perform security hardening across Windows and Linux systems and implement cybersecurity best practices enterprise-wide
- Coordinate incident response activities across multiple security platforms and enterprise ticketing systems
- Partner with infrastructure and network teams to strengthen overall security posture for national critical infrastructure

Information Technology Support Engineer — AzInvest Telecom Technology *Jul 2025 – Sep 2025*

Baku, Azerbaijan

- Administered Windows and Linux systems across enterprise infrastructure, managing user accounts, access permissions, and system configurations
- Configured and maintained network infrastructure, troubleshooting connectivity and hardware issues to ensure operational continuity
- Resolved technical support tickets across systems and network environments, maintaining infrastructure reliability and minimizing downtime

SOC Analyst (Intern) — AzInTelecom *Jun 2024 – Jul 2024*

Baku, Azerbaijan

- Supported Governance, Risk, and Compliance (GRC) activities alongside daily SOC operations
- Monitored SIEM alerts and assisted tier-1 analysts with real-time incident triage and investigation
- Analyzed alert generation and log correlation across enterprise systems to support detection engineering workflows

Volunteer, Cybersecurity Department — Azerbaijan Technical University *Oct 2022 – Oct 2024*

- Provided technical training and peer mentoring by assisting academic staff in delivering network security labs and Blue Team workshops
- Helped design and run attack-defense simulation exercises, including setup and configuration of virtual machines
- Contributed to peer-led security projects and campus-wide cybersecurity awareness initiatives

EDUCATION

Master's Degree, Cybersecurity — Azerbaijan Technical University *Jul 2025 – Jul 2027*

Current GPA: 95/100

Bachelor's Degree, Information Security — Azerbaijan Technical University *Sep 2021 – Jul 2025*

GPA: 90.30/100

TRAINING & PROFESSIONAL DEVELOPMENT

Blue Team Defender Program — Technion / Azerbaijan Cybersecurity Center *Jan 2025 – Jul 2025*

- Completed 600+ hours of defensive cybersecurity training
- Specialized in SIEM (Splunk, Wazuh), Threat Hunting, SOAR, EDR/XDR, and CTF competitions

Network and System Administration — Code Academy *Sep 2023 – Jan 2024*

- Trained in network fundamentals: architecture, IP addressing, subnetting, routing, switching, and device configuration

Cyber Security Program — Codelandia IT School and Software Center*May 2024*

- Completed full-scholarship cybersecurity bootcamp covering core security operations concepts

CERTIFICATIONS & AWARDS

- CCST Cybersecurity — Cisco Certified Support Technician, Cybersecurity
- CCST Networking — Cisco Certified Support Technician, Networking
- Network Administration Honor Diploma — Code Academy
- Technest Scholarship Program — Winner (x2)
- Codelandia Cybersecurity Bootcamp — Full Scholarship Graduate
